DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-26, drawn to Figures 6-15.

Group II, claim(s) 27-42, drawn to Figures 19-21.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I discloses a driving scheme that entails turning on a selection transistor to allow gradation pixel data to be written into a holding capacitor. Next, the pixel data is discharged from the holding capacitor through a drive transistor for a predetermined period of time. Finally, the gate electrode of the drive transistor is left floating to hold the charges of the pixel data stored in the holding capacitor.

However, Group II discloses a different driving scheme wherein said selection transistor is turned on to input a first signal voltage from a signal line to discharge signal charges written in said holding capacitor through said drive transistor in a selection period of a drive circuit. Thereafter a second signal voltage is input from said signal line and held in said holding capacitor and said selection transistor is turned off to pass a

current through said drive transistor to said current control element in a non-selection period of said drive circuit.

Although, the structure of the circuits is the same, the method of driving is very different. Therefore, Groups I and II are restrictable.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
